

Cambria Community
Healthcare District

AMBULANCE FACILITY

FOR THE 21ST CENTURY

DID YOU KNOW?

- The Cambria Community Healthcare District operates our community's ambulance and emergency medical services?
- The CCHD facility located at 2515 Main Street is 65 years old and no longer provides a safe and healthy work environment for our EMS crew or staff?
- The CCHD facility does not meet current County or State building codes and standards for:
 - ▶ Fire sprinklers
 - ▶ Electrical and plumbing systems
 - ▶ Heating, ventilation and cooling systems
 - ▶ Hazardous materials such as asbestos
 - ▶ ADA Accessibility
 - ▶ Building security for crews and medications
- Ambulances are parked outdoors causing:
 - ▶ Accelerated body rust
 - ▶ Increased repair costs
 - ▶ Shortened service life
 - ▶ Unsecured parking of expensive emergency response vehicles

WHAT CAN WE DO TOGETHER

to Provide a 21st Century Solution?

- ▶ Build a replacement ambulance facility to last 50+ years
- ▶ House FOUR ambulances securely
- ▶ Provide large, heated triage and evacuation area
- ▶ Meet all building codes and standards
- ▶ Provide whole-facility solar power with battery backup
- ▶ On-site fuel storage and dispensing

THE COST?

Approximately \$10 per \$100,000 assessed property value annually for a 30 to 32-year bond.

The CCHD values community input. If you have questions or comments please contact us by phone **805.927.8304** or visit the CCHD website at www.cambria-healthcare.org
